

## Quality, broad-range materials

Schafer Solutions sources and applies a wide range of plastic materials, including those listed below. Many are carried in stock to allow rapid response to prototype, first-run and volume upside requirements. Our products often incorporate wood and metal components as well.

We select and specify the ideal materials for your product, considering appearance, strength, cost, intended application and lifetime.

And while assuring that our products meet all of your requirements, we work to do so with the smallest environmental footprint possible – with minimum waste, active recycling and the use of sustainable materials where environmentally friendly alternatives are economically available.
